Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4,10-16,20-22,24-27,33-39, and 43-45 are rejected under 35 U.S.C. 102(b) as being anticipated by Jaffe et al. (3715636). Jaffe et al. shows in Fig.2 ; a hollow truncated spherical housing "24" made of glass or plastic with a light emitting diode "18" positioned at the center point of a sphere defined by the spherical curvature of the housing "24". Jaffe et al. shows in Fig.3 a gold coated reflective surface "32".

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 5-9, 17-19, 28-32, and 40-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jaffe et al. (3715636). Claims 5-9 and 28-32 distinguish over Jaffe et al. only in that specific thicknesses and diameters are set forth for the housing. It is well known to change the size and dimensions of a device where the device does not perform differently than the prior art (see MPEP 2144.04; In *Gardner v. TEC Systems, Inc.* 725 F.2d 1338 220 USPQ 777, Fed Cir. 1984). It would have been obvious to one of ordinary skill in the art at the time of the invention to change the size and dimensions of Jaffe et al.'s housing since the use of certain sizes and dimensions enable one to reduce manufacturing costs of the device. Claims 17-19 and 40-42 distinguish over Jaffe et al. only in the type of light source used. It is well known in the art to change the type of light source used in a device to change the size or shape of the light emitted where the device does not perform differently than the prior art with the same change (see MPEP 2144.04; In *Gardner v. TEC Systems, Inc.* 725 F.2d 1338 220 USPQ 777, Fed Cir. 1984). It would have been obvious to one of ordinary skill in the art at the time of the invention to change the type of light source used in Jaffe et al.'s housing since the use of various types of light sources change the type of light emitted and enable one to provide the desired lighting in a more economical manner.

Allowable Subject Matter

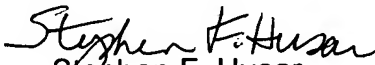

6. Claims 23 and 46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
